WHAT IS CLAIMED IS:

1.   A method for publishing images at an accessible website and for ordering goods and/or services to be provided by a fulfillment provider with respect to images stored at said fulfillment provider, comprising the steps of:

said fulfillment provider receiving a high resolution digital image from a user device over a communication network;

said fulfillment provider storing said high resolution digital image and associates a unique ID with said high resolution image, said unique ID identifying the storage location of where said high resolution image is stored and provides information as to the internet address of the fulfillment provider;

forwarding said unique ID to said user computer;

said accessible website receiving from said user device a low resolution image copy of said high resolution image and said unique ID;

said website publishing said low resolution image on an accessible website along with an action button that is associated with said unique ID;

forwarding a viewer of said website to said fulfillment provider when said action button is selected by said viewer so that the viewer will be able to place an order directly with said fulfillment provider for ordering goods and/or services with respect to said high resolution image stored by said fulfillment provider.

2.   A method according to claim 1 wherein the service being provided by said service provider comprises printing, e-mailing, sharing or obtaining the high resolution copy of said image.

3.   A method according to claim 1 wherein said selection of said selection button automatically results in obtaining a hard copy print that uses the high resolution stored high resolution image stored in said memory.

4.   A method according to claim 1 wherein said accessible website and fulfillment provider are the same site.

5.   A method according to claim 1 wherein said one or more images are published at said accessible website in an HTML format.

6.   A method according to claim 1 wherein said image is provided to said website and said service provider in a JPEG (including jpeg 2000) format.

7.   A method according to claim 1 wherein said image is displayed at said publicly accessible website in a diary format.

8.   A method according to claim 1 wherein software is provided on said user computer for use in creating a web log at said accessible website.

9.   A method to according o claim 1 wherein a capture device automatically identifies an digital image for automatic transfer to said accessible website and fulfillment provider.

10.   A method according to claim 9 wherein said identification comprises a voice activated command with respect to said capture device.

11.   A method according to claim 8 wherein said software allows appending of existing web log with new images and new log entries.

12.   A computer software program for publishing images at an accessible website and for ordering goods and/or services to be provided by a fulfillment provider with respect to images stored at said fulfillment provider, said software program when loaded on to a user computer will cause the following steps to occur:

forwarding a high resolution digital image from a user device over a communication network to said fulfillment provider, said fulfillment provider storing said high resolution digital image and associates a unique ID with said

high resolution image, said unique ID identifying the storage location of where said high resolution image is stored and the internet address of said fulfillment provider;

receiving from said fulfillment provider said unique ID associated with said high resolution image; and

forwarding to said accessible website from said user device a low resolution image copy of said high resolution image and said unique ID, said website publishing said low resolution image on an accessible website along with an action button that is associated with said unique ID, selection of said action button by a viewer causes said viewer being forwarded to said fulfillment so that the viewer will to be able to place an order directly with said fulfillment provider for ordering goods and/or services with respect to said high resolution image stored by said fulfillment provider.

13.   A computer software program according to claim 12 wherein the service being provided by said service provider comprises printing, e-mailing, sharing or obtaining the high resolution copy of said image.

14.   A computer software program according to claim 12 wherein said selection of said selection button automatically results in obtaining a hard copy print that uses the high resolution image stored at the fulfillment provider.

15.   A computer software program according to claim 12 wherein said accessible website and fulfillment provider are the same site.

16.   A computer software program according to claim 12 wherein said one or more images are published at said accessible website in an HTML format.

17.   A computer software program according to claim 12 wherein said image is provided to said website and said service provider in a JPEG (including jpeg 2000) format.

18.   A computer software program according to claim 12 wherein said image is displayed at said publicly accessible website in a diary format.

19.   A computer software program according to claim 12 wherein a capture device automatically identifies a digital image for automatic transfer to said accessible website and fulfillment provider.

20.   A computer software program according to claim 19 wherein said identification comprises a voice activated command with respect to said capture device.

21.   A method for publishing images at an accessible website and for ordering goods and/or services to be provided by a fulfillment provider with respect to images stored at said fulfillment provider, comprising the steps of:

forwarding to said accessible website receiving from said user device a low resolution image copy of said high resolution image and a unique ID, said unique ID identifying the storage location of where a high resolution image of said low resolution is stored and provides information as to the internet address of the fulfillment provider;

said website publishing said low resolution image on an accessible website along with an action button that is associated with said unique ID;

forwarding a viewer of said website to said fulfillment provider when said action button is selected by said viewer so that the viewer will be able to place an order directly with said fulfillment provider for ordering goods and/or services with respect to said high resolution image stored by said fulfillment provider.
